

Enterprise Communications Systems (ECS) Compliance Waiver Request Form

The *Rule Governing the 9-1-1 Requirements for Enterprise Communications Systems* was adopted pursuant to 30 V.S.A. § 7057. The purpose of this rule is to define the 9-1-1 requirements for all Enterprise Communications Systems (ECS), also referred to as privately-owned telephone systems or multi-line telephone systems, that provide access to the Public Switched Telephone Network (PSTN) for end users within the State of Vermont.

In accordance with the Rule, the Vermont Enhanced 9-1-1 Board may grant a waiver to these requirements if, in the judgment of the Board, the ECS is actively engaged in becoming compliant with this rule, is likely to comply with this rule in a reasonable amount of time and will do so in accordance with standards and procedures adopted by the Board by rule.
